Commercial & Industrial Business Print Campaign

“Find more opportunities”

National Grid Commercial & Industrial Business Campaign

During the pandemic, some businesses were very successful. Others were just trying to get by. No matter the situation, Mower and National Grid wanted to help them with the resources, financing and expertise they needed during such challenging times.

This started with a simple mindset: be sensitive to the current business climate. This thinking that drove our strategy was not to sell products, but start conversations about finding opportunities to see energy efficiency as a business strategy.

From keeping employees, customers and tenants safe and healthy, to managing increasing comfort and productivity. All of these challenges were adding up, but so were the opportunities to find relief, savings and support—and they are in more places than ever before.

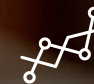

TAKE OUT

up to 30%

OF YOUR
ENERGY COSTS

Cut out unnecessary costs from your business by finding more opportunities in more places.

Learn how we can lower your operational costs by up to 30% with energy-efficient strategies, ideas and plans specifically designed for small businesses like yours.

 No-cost energy efficiency assessments

 Small-business specific programming

 Bill forgiveness and payment plans

See more possibilities.

EDUCATION

Looking for ways to keep your herd more comfortable and productive?

Energy efficiency can help with both.

Provide better care for your animals—and your bottom line—when you upgrade to more energy-efficient processing equipment that not only reduces energy costs, it increases production, too. Right now you can get 0% financing on select energy upgrades, including:

- Ventilation fans to keep cows cool and increase milk production
- LED lighting that can dramatically decrease your energy bill
- Milk/water transfer pumps with VSD, plate coolers and more

To learn more, call Bob Muller at (518) 810-6224 or visit ngrid.com/agriculture.

nationalgrid

Incentive offers vary by service territory. These programs are funded by the energy-efficiency charge on all customers' gas and electric bills in Upstate New York per state regulatory guidance. 0% financing available for 24- and 36-month terms. Financing and streamlined application decisions subject to credit parameters. Neither Ascendum Capital or National Grid is the agent of the other. Ascendum Capital, not being the manufacturer, seller or distributor of the property being financed, makes no representation or warranty concerning it, including any representation or warranty related to energy efficiency, cost savings, or positive cash flow related benefits. Financing described herein is available only for National Grid customers' project to purchase qualifying energy-efficient equipment, fixtures, systems and other resources. All projects must receive prior approval from National Grid. Incentive program is only available until the funds in the National Grid pilot program have been exhausted.

AGRICULTURE

Let's start with some small strategies that will make a big impact.

We understand that for many building owners, investing scarce resources on energy-efficiency upgrades isn't feasible quite yet. However, there are relatively minor upgrades you can make right now that can have a significant impact on your energy costs and your property. When you're ready, talk to us about low- and no-cost ways for reducing your overhead, while improving the health and safety of your units and your business.
