

### **ABB Ability**™ **Genix**.

The power to run smarter.

There's a big difference between having data and actually using it. ABB Ability" Genix Industrial Analytics and AI Suite integrates your operational, engineering and business data with analytics and AI, giving you the ability to manage assets predictively, improve processes efficiently, produce safely and sustainably, optimize supply chains effectively and streamline your overall operations. How smart is that? Learn more at new.abb.com/genix.

# **ABB Ability™ Genix.** That's how you run a smarter mine.

Today's mines are better positioned than ever before to become automated, electrified and connected, especially with a partner like ABB. We combine first-hand experience with tailored, digital solutions to solve tough problems and deliver real value. ABB Ability™ Genix is augmenting these proven solutions with the power of industrial analytics and AI, giving you the ability to optimize every aspect of your operation, from mine to port and from plant to enterprise. The better you can mine data, the better you can mine everything else. Learn more at new.abb.com/mining/digital.

#### Genix lead email

ABB

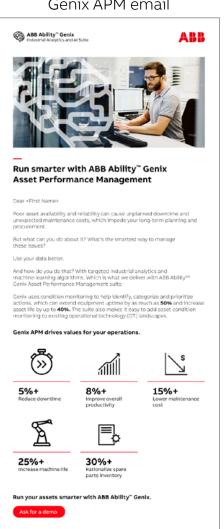

There's a big difference between having data and being able to use it to optimize operations.

Fortunately, evolving technology is helping to bridge that gap by applying AI and machine learning to the challenge. This paper by ARC the Advisory Group explores how cloud-enabled software, such as ABB Ability" Genix Industrial Analytics and Al Suite, can help improve operations by extending asset life, smooth process performance, promote safety and sustainability, and optimize the supply chain.
